

VELICIA CHRISTINA GABRIEL

+62 858 4005 1341 | veliciagbrl@gmail.com | [LinkedIn](#) | [Github](#)

Third-year Information Systems and Technology student at ITB, driven by an ambitious commitment to continuous growth in Data, AI, and Product ecosystems. Adept at bridging the gap between technical engineering and strategic product vision, a synergy proven by 10+ awards and IT related projects. With a track record of managing 30+ project managers and delivering end-to-end digital solutions, focused on leveraging analytical precision and leadership to build high-impact, data-informed innovations.

EDUCATION

Undergraduate Student of Information Systems and Technology

Bandung, Indonesia

Current GPA: 3.91 (104 credits)

August 2023 - Present

- Relevant Courseworks: Database Modelling, Database Management, Foundation of Artificial Intelligence, Web and Mobile Application Development, Human Computer Interaction, Enterprise Requirements Analysis, Enterprise Analysis

PROFESSIONAL EXPERIENCES

Database Laboratory Assistant, STEI ITB

September - December 2025

- Coordinated the practical aspects as an assistant coordinator of database modelling course, designing comprehensive problems and assignments for 120+ students, scoring, and assisting for the whole semester.
- Created a scoring system using Excel/Google Sheets with complex formulas, import range for cross-sheets data integration, and advanced filtering for 120+ students grading.
- Developed a library of 55+ SQL problem sets rooted in real-world scenarios to bridge the gap between theory and practice, while carefully evaluating advanced modeling projects to ensure students met high standards of data integrity and optimization.
- Assisted 20+ students directly to master database system design by coaching them through the lifecycle of database modeling, from initial problem analysis to the implementation of clean, insightful SQL query.

Project Manager, Inkubator IT Informatics Students Association (HMIF) ITB

September 2024 - Present

- Lead comprehensive requirement gathering and scope definition to ensure 100% alignment between client objectives and technical deliverables, effectively eliminating project drift.
- Facilitate seamless collaboration between clients and development teams throughout the project lifecycle, maintaining clear communication channels that prevent bottlenecks and ensure timely delivery.

LEADERSHIP EXPERIENCES

Vice Chief Operational Officer, Inkubator IT

June 2025 - Present

- Manage 30 project managers and oversee IT-related projects through all phases, from meticulous planning and rigorous testing to thorough evaluation, ensuring successful outcomes.
- Maintain the project managers succession rate by reaching 4.25/5.00 rates from the clients.
- Managed projects with a total value of approximately IDR 150 million throughout the tenure of the management period.

Director of Partnership The Sandbox 2.0, IEEE ITB SB

October 2024 - June 2025

- Successfully directed Media Partner & Intracampus, External, and Sponsorship Divisions by fostering collaborations for The Sandbox 2.0 with 20+ internal and external stakeholders.

Project Officer of Open House Unit, Technoentrepreneur Club ITB

July - October 2024

- Managed various divisions: relation, event, operational, relation, and Marketing & Branding. Ensure each supporting component for the OHU has completed and executed well with 30+ associated.

HONORS & AWARDS

[National] Top 10 Finalist L'Oréal Brandstorm 2026

2026

- Achieved Top 10 Finalist (top 3%) out of 311 teams by spearheading the development of a tech-integrated fragrance solution to elevate user sensorial interaction.

[National] 1st Winner of Hackathon ISMC XV HMT ITB

2026

- Developed a real-time mobile Early Warning System (EWS) for underground mining to detect structural instabilities and prevent industrial accidents through automated safety alerts.

- [International] 1st Honorable Mention of ShARE UI International Business Case Competition** 2026
- Formulated end-to-end strategies for manufacturing, logistics, and product development within a 24-hour sprint to optimize supply chain efficiency and organizational culture.
- [National] Bakti BCA Scholarship Awardee (top 7%)** 2025
- Executed an operational strategy for a Bandung-based micro-business, resulting in a measurable increase in foot traffic and sales revenue.
 - Completed 5+ professional training in project management and personal growth, applying these frameworks to lead and streamline community-focused initiatives.
- [National] Finalist of Data Slayer 3.0 Data Analysis Competition** 2025
- Optimized national food distribution by engineering a data pipeline from warehousing to visualization to resolve supply chain bottlenecks based on 3 core KPIs.
- [National] 1st Runner Up BizzIT Compfest 17 Fakultas Ilmu Komputer UI** 2025
- Delivered a digital transformation solution in 8 hours, featuring secure database access controls, a real-time executive dashboard, and a high-conversion UI/UX redesign.
- [National] 1st Winner of EcoVation Business Case Competition Do Well Do Good Binus University** 2024
- Generated a market expansion strategy for "Tavi" by leveraging sustainable and cruelty-free product positioning to drive customers' brand loyalty and sales growth.
- [National] 2nd Winner of Digivathon Business Case Competition Universitas Pendidikan Indonesia** 2024
- Designed a multi-channel strategic marketing roadmap for "Akademi Business Case" to maximize brand awareness and service visibility in the educational sector.

PROJECTS

- TAMENG (Tambang Monitoring & Early Warning System) Mobile Application** *IT Project 2026*
- Engineered a mobile-based early warning system utilizing Edge AI for real-time image analysis and Seismic Data Integration (BMKG) to identify hazardous underground mining cracks.
- Ketahanan dan Tantangan Pemerataan Pangan Dashboard Analytics** *Data Project 2025*
- Developed an analytical dashboard addressing Indonesia's food security challenges by sourcing and consolidating raw data, transforming it into a structured and insight-driven dataset, and visualizing key findings through Tableau to support data-informed decision-making.
- KodeKiddo Website Scraping** *Data Project 2025*
- Performed ETL data scraping from company profile websites using Python, parse the extracted information, and import the processed data into structured JSON format, followed by executing data query analysis using PostgreSQL.
- CuanQ Financial Application UI/UX Design** *IT Project 2025*
- Developed a prototype for a financial application called CuanQ, starting with user research and requirement gathering, followed by creating low-fidelity wireframes and progressing to high-fidelity interactive prototypes.
- Laboratorium Teknik Biomedika Website and Mobile App** *IT Project 2025*
- Developed a website and mobile application for the Laboratorium Teknik Biomedika STEI ITB using NestJS, Firebase, and React Native, designed to serve both laboratory assistants and course participants. The website includes splash screens, hero pages, and specialized features that support laboratory activities, such as experiment scheduling, equipment lending, and course-related information.
- Fraud Detection Data Science** *Data Project 2025*
- Built a robust classification model to identify fraudulent transactions within a 30+ features in the dataset, meticulously handling data cleansing and imbalanced classes to ensure high detection accuracy and minimal false positives.
- Bin Packing Problem Artificial Intelligence Modelling** *AI Project 2025*
- Developed custom Artificial Intelligence models from the ground up to solve complex bin packing challenges, engineering specific objective functions to achieve the most resource-efficient model.

ADDITIONAL INFORMATION

- Softskills: Public Speaking, Critical Thinking, People Management, Teamwork, Leadership
- Hardskills: Microsoft Office, Canva, Figma, Python, HTML, CSS, JavaScript, Java, NestJS, NextJS, React, Tableau, SQL, RestAPI
- Interests: Data Analytics, Business Analysis, Product Analysis, Artificial Intelligence, IT Solutions, Project and Product Management
- Language: Indonesian (Native), English (Advanced), Chinese (Elementary)
